Verges

The dimension of the verge is the distance between the pallets. To find the correct verge, count the number of teeth on escape wheel and refer to the table below for the correct number of teeth the verge must embrace.

Number Of Teeth Escape Wheel	Number Of Teeth To Be Embraced
30 to 39	8
40 to 43	9
44 to 46	10

Now measure the distance across the embraced teeth plus the distance between two teeth to get the closest verge measurement.
