Visa, MasterCard & Discover Are Welcome

Sorry, we can not ship glass outside continental North America.

Cutting Clock Glass

Kitchen Clock Glass

We can custom cut clock glass to your specifications, however, **you must send us a template** indicating the exact size and shape you'd like the glass to be cut. Measure the inside of the door frame allowing a 1/16" space for the glass, or trace around the old glass and note this on the template. Use a thin piece of paper, not a brown grocery bag. **Mark the position of the bottom of the dial pan.** If the door frame is not true, indicate which side of the pattern is to be on the outside. Please double check your measurements and be sure the glass you have chosen will properly fit your clock. We will **not** cut glass without your template.

Square Or Rectangular Glass

Provide the width and height to the nearest 1/16".

Odd Or Special Shaped Glass

Either provide a template or draw a simple diagram which indicates all of the necessary dimensions.

Plain Glass Cutting

We can cut plain, clear glass. The charge is \$3.00 per square foot for the glass **plus** the cutting charge as indicated below.

Guarantee

We guarantee our glass cutting on all orders which have a template provided. We can not guarantee against breakage if you cut the glass. We can not accept returns on cut glass. **Please allow two weeks for glass cutting.**

Cutting charges:

4 Cuts - \$7.50

5 Cuts - \$8.00

6 Cuts - \$8.50

Radius Cuts - \$9.00

* Goes with Standard lower glass

No. 30034.

How To Measure Your Kitchen Clock Glass

1.) You must provide all **outside** dimensions, height x width, on your template.

2.) You must also provide dimension "H", that is, the distance from the bottom of the dial pan to the bottom edge of the glass.

Note: Choose a pattern from our listing where the "H" (height) does not exceed the required "H" (height) dimension on your clock. Otherwise the bottom of the pattern may be cut off.
